

# Digital Health and Care Wales

## Business Change Support Officer Programme launched

- **Investment in apprenticeships to show improvement in delivery of key digital services**

A new 'Business Change Support Officer' programme, hosted by the Digital Change Delivery Network, was recently launched. The programme will offer successful candidates the opportunity to join Digital Health and Care Wales' Business Change team and undertake professional qualifications and training alongside their role.

Business Change is leading the way for delivering seamless change by supporting teams from the planning stage through to implementation and beyond.

The UK Careers Fair offers candidates opportunities to boost their career or discover diverse career paths. The fair provided Digital Health and Care Wales (DHCW) with an excellent opportunity to promote the programme to a wider audience. The role has already garnered a lot of attention and increased the interest of the number of people wanting to join DHCW.
